

The Henley Compact – Mini

Our Compact Mini Office is a fine example of good design that will always last.

Great features and long-lasting looks. What more could you ask for? You don't buy a Garden Office every day, so when you do; you want to make sure that it will stand the test of time.

The Mini offers a mixture of ageless design and practical utility that will improve the heart of any garden.

Whether the style of your property is mainly traditional or contemporary, a Compact Mini Office never looks out of place. What's more, it is very well-designed as a dedicated home office.

Clean lines and subtle curves are Henley's signature features, and they are set off perfectly by a range of painted external finishes, double glazing, carefully chosen carpets and blinds, with contrasting desktops and furniture, that are perfect for the home office.

The sheer flexibility of these neatly designed Offices makes them a popular choice for the smaller garden, or areas where you may wish to avoid planning permission

As with all Henley Offices, craftsmanship is key. All of our offices, for example, are built using structured Insulated panels (SIP), for added strength and high levels of insulation.

The Henley Compact Mini can be used all year round, with low heating costs in the winter, high security windows, door locks with toughened glass and double glazing.

Hidden electrics, sockets and down lights are standard, giving you a high quality, office space with contemporary décor.

Options include Integrated modern furniture with fitted cupboards, desktop & shelving, brushed steel Venetian blinds & carpeting

And to complete the package, the Mini comes with a professional fitting and planning service included, onto your own prepared base.

The Henley Compact – Mini
